Win an Intel Mac mini loaded with software!

PRIZES WORTH £2,080 IN TOTAL

Write a great Mac program and win an Intel Mac mini thanks to Runtime Revolution

This month we have an amazing competition for you to enter with three fantastic prizes to give away, including a Mac mini and some great software. To be in with a chance to win, you have to create a Mac application from scratch using a trial version of *Revolution Studio*, included on this month's DVD. That might sound like an impossible task, the kind of job that requires a degree in computer science, but it's far easier than you might think.

Revolution Studio is one of the fastest, easiest and best ways to build interactive software and games. There's a drag-and-drop interface, simplified English programming language and easy-to-understand structure that hides enormous power behind the scenes. You can use it to develop an application that

will run on a Mac, Windows and Linux environment too! Try it out.

Runtime Revolution has teamed up with *MacFormat* this issue to provide fantastic prizes for the best entries.

The best application will win 1st prize: an Intel Mac mini running *Revolution Enterprise* software worth £1,150. Second place will take home a copy of *Revolution Enterprise* worth £700, with third place winning a copy of *Revolution Studio* worth £230.

As a special incentive for entering all winning entries will also have their work included on the *MacFormat* DVD and promoted by Runtime Revolution – not a bad start for any programmer. If you have an unpublished program already or nearly built, you can adapt it for universal binaries using Runtime Revolution's

Studio and enter that, too. And just for entering, all participants will receive a voucher worth 30% off any Revolution products, plus automatic entry into a prize draw for a 512MB iPod shuffle.

It's a great prize, so fire up *Revolution Studio* from our DVD and get started! ●

How to enter
No purchase of additional software is necessary. All entries must be received before 8 August 2006. For a full list of this issue's competition details, how to enter and where to submit creations, visit *MacFormat*'s homepage **www.macformat.co.uk** and follow the link for the Runtime Revolution Competition. Good luck!
